	Urgent	Not Urgent
Important	Do - (Your MVP) 1. Allow two players to play Connect 4 through the terminal. 2. Display the game board and update it after every move. 3. Automatically detect when a player wins or the game ends in a draw. 4. Prevent players from making invalid moves, such as placing a piece in a full column.	Schedule - (For V2.0+) 1. Add different board sizes or game modes. 2. Allow players to play against a computer. 3. Keep track of player names and previous wins. 4. Add a rematch option and display overall win statistics.
Not important	Delegate - (Use a library) 1. Use a library to improve the appearance of the terminal board, if needed. 2. Use existing tools to help test different game scenarios. 3. Use a library for additional visual effects, if needed.	Delete - (Cut it) 1. Player images and animations. 2. Online multiplayer and accounts. 3. Complicated ranking systems and leaderboards. 4. Chat features or other social functions.
